

## Foundations for Responsible Business

(August 2024)

### ENVIRONMENTAL RESPONSIBILITY

As an SME in the electronics and workwear sectors, we are ever conscious of our environmental impact and trading responsibly is at the core of our business principles and working practices.

This year we have been sponsored by Siemens onto [Heart of the City's](#) 'Foundations for Responsible Business' programme. With their support, we will be working with excellent available resources to greatly enhance how the Company operates.

We are committed to minimizing our ecological footprint, preserving natural resources, and fostering sustainable practices throughout our operations with a continuous improvement program.

As part of the Siemens sponsored program, we will also have access to resources to help us improve and maintain our business working in an ethical, sustainable, and socially responsible manner.

We look forward to working with Heart of the City and Siemens on this journey.

SMEs across the UK can do the same and join Heart of the City:
